<u>IN THE ABSTRACT</u>:

Please amend the Abstract as follows:

An image processing apparatus <u>is provided. The image processing apparatus includes a holding unit</u> ~~comprises hold~~ means for holding setting information <u>for</u> every user, <u>an</u> input <u>unit</u> ~~means~~ for inputting a print job, and <u>an</u> adjustment <u>unit</u> ~~means~~ for specifying a user who instructs the print job according to print job information and adjusting a color image on the basis of the setting information of the specified user. Accordingly, a precise color adjustment fitting to each user can be realized by providing the profile for the color adjustment <u>for</u> every user.
